

## Goals of the Program

- To create a collegial atmosphere where teaching and learning will flourish.
- To educate residents to become well-rounded pediatricians, with experience and training necessary to function as primary care pediatricians.
- To provide residents with the background needed for future training in any pediatric subspecialty.
- To foster a professionalism applicable to all encounters with patients, families, and colleagues.
- To provide residents with understanding and appreciation of the integrated healthcare team as an approach to patient care.
- To teach residents to appreciate a cost-conscious approach to patient care.
- To provide residents with an opportunity to develop expertise in computer-based information systems.
- To prepare residents to pass the certification examination of the master degree of pediatrics.
